**We'll Help You in Furnishing the New Home**

**Our Form of Credit Enables You to Have Just What You Want, and to Have It at Once**

Many young people are to be married within the next few weeks. The bride of June is already planning her new home and its furnishings. She is giving her greatest thought to the selection of their future surroundings.

To these young folks we can give positive assurance that our firm will extend a greater amount of help in this direction than can be had elsewhere.

They know that every store will grant them some form of credit, but the question is, Where will their credit be given the most value to them?

Let plain facts answer that question.

We will sell them goods of which the quality is absolutely right. We guarantee long and satisfactory service. They find every article marked in plain figures, at the credit price, that they may see by comparison that prices elsewhere are no lower.

All purchases are made and the prices settled by the tags before we inquire as to how or when they wish to pay. Then if a long-time open account is desired we arrange for divided payments that will suit their circumstances. We require no signing of notes and charge no interest. We ask no questions about their private affairs, for we grant personal credit as a right, not as a favor.

That is our standard for all, but to the young folks we are always ready to extend an extra amount of help in the matter of terms, and we say to you, COME HERE, for we will give you the best and the most.

This same consideration will be given those who have just come to Washington to enter the government employ. We realize that the furnishing of a home is a big item, and we'll gladly arrange such small weekly or monthly payments that they may enjoy home comfort and beauty without drawing heavily upon their resources.

## HOUSE BALL THROSSERS ARE NOW HARE TRAINING

Saturday's Game for Benefit of Red Cross to Be a Real Contest.

With Representative Byrnes of South Carolina carrying around a "bum" knee and Representative Pat Harrison of Mississippi limping on a sore arm, to say nothing of general complaints due to stiffness and bruises, several members of Congress today have evidence of the preparations that are under way for the annual congressional baseball game, to be played at a moment's notice Saturday, for the benefit of the Red Cross.

The contest between the democratic and republican lines this year is going to be no farcical contest, but a real, sure enough diamond battle. Heretofore the athletic contests have made no effort to get themselves in condition for the game and have been content to call quits at the first park game. But the unusual interest being taken in the game this year has changed the order of things. The ball park now is the scene of daily practice in the afternoon by the leading athletes of the House. And it's going to be a real line-drawing match, fought to a finish every inch of the way.

**Stops a Line Drive.**

Congressman Byrnes, democrat, while in the line in left field yesterday, gazing intently at a fly ball, got in the way of a line drive from the bat of Representative Miller of Minnesota, republican, with the result that he is eliminated from the candidates. But he has been clothed with the title of manager of the democratic team, and before he went to work this morning he called at the district building and engaged Robert Barr, pitcher in the National League, to pitch for the democratic team. Barr, who formerly pitched in the National League, will have his democratic charges out at American League Park at 4:30 o'clock this afternoon, and at the same hour tomorrow, when they will receive their democratic preparation for Saturday's struggle.

Representative Harrison, captain of the democratic team, expects to do some of the pitching, tried a few fast ones yesterday, of which he was reminded every time he moved his arm today. But Coach Barr doesn't work the stiffness out by Saturday. Representative Webb of North Carolina probably will be on the mound for the democrats.

Representatives Byrnes and Harrison conferred at the district building today with Chairman Hazen of the citizens' committee in charge of the game, relative to obtaining suits and other paraphernalia. They reported that practically all of Congress will be on hand to root for the respective teams of the two parties.

Chairman Hazen announced that Washington officialdom will turn out for the game in unprecedented numbers. Vice President Marshall and all the members of the cabinet have engaged seats. Department heads have reported gratifying progress. In addition to the ball game, the bill by Port Moxey, reserving the big crowd expected, tickets are on sale in all drug stores, the prices being 50 cents for admission and \$1 for a reserved seat. The entire proceeds will be donated to the Red Cross fund.

## SAYS IMMIGRATION LAW IS BEING NULLIFIED

Representative Burnett Complains of Admission of Mexican Farm Hands.

Representative John L. Burnett, chairman of the immigration committee of the House, and largely responsible for the recent immigration bill which bears his name and which became a law over the President's veto, made charges last night before an open meeting of the Anacostia Council, No. 16, Junior Order of United American Mechanics, held in Masonic Hall in Anacostia, to the effect that certain officials charged with the administration of this law were making every attempt to nullify it and were hiding behind the cloak of military necessity in so doing. The commissioner of immigration and Assistant Secretary Post of the Department of Labor were the two men named by Representative Burnett. "Both of these gentlemen were bitterly opposed to the passage of the bill," he said, and he called attention to the fact that undesirable residents of Mexico and Canada who would be refused admission to this country under the terms of this law were being allowed to come into the country under the pretense that they were needed to work the farms. He said that if this condition was allowed to continue, there would be no end to the reasons which might be given for allowing any one to enter the country who would be kept out by this law. "These men are allowing the meanest and dirtiest of Mexicans to come into this country, and the practice should be stopped at once," he said.

Representative Burnett paid a tribute to the Junior Order of United American Mechanics, and said that this and other fraternal organizations had played an important part in cementing the broken ties between the north and the south occasioned by the civil war. Junior Past National Council Webb of Statesville, N. C., also was a speaker, and told of the work being done by the order throughout the country. Several hundred members of various councils throughout the District were present, together with numbers of visitors, who were urged to become affiliated with the organization. The committee of Anacostia Council in charge of the meeting included F. C. Prather, chairman; W. J. Mitchell, Roy Brashers, Julius Owens and Roy Thomas.

## COAL PRODUCERS GIVE ASSURANCE OF FAIR PRICE

Cost to Be Determined by Special Committee With Approval of National Defense Council.

Assurances that the government and the general public will be furnished coal at a reasonable price were given by representatives of both hard and soft coal interests who agreed today to confer with the national defense council's coal committee.

This is the coal operators' answer to warnings by Secretaries Lane and Daniels and others that unless they established fair prices and proper regulations their output would be taken over by the government.

The price of coal is to be determined, with the defense council's coal committee's approval, by a special producers' committee, which aims also to increase production and facilitate distribution.

The conference today received nominations for special committees representing each coal mine state, and selected pursuant to resolutions adopted by the operators, to fix the price of coal.

Gov. Goodrich of Indiana, in a letter to the federal trade commission just made public, urged solution of the coal situation by increasing the power of the interstate commerce commission. "With the interstate commerce commission given the power possessed by the Indiana commission to order preference given to certain kinds of freight," he wrote, "and with heavy demurrage charges and the limitation on the right to reconsign coal, and then with an adequate force of inspectors to see to it that these orders are carried out, the coal situation can be largely worked out. That the operators do not want an adequate supply of cars is being conclusively demonstrated in our state. We find them loading cars to remain in cars, paying a light demurrage, so the demurrage should be prohibited after the first forty-eight hours."

## URGES U. S. MUST AVOID OTHER COUNTRIES' ERRORS

Dr. P. P. Claxton Maintains That There Shall Be No Lowering of Our Educational Efficiency.

That there shall be no lowering in the efficiency of the systems of education in this country is urged in a bulletin sent out by Dr. P. P. Claxton, United States commissioner of education.

"Schools and other agencies of education must be maintained at what ever necessary cost and against all harmful interference with their regular work, except as may be necessary for the national defense, which is, of course, our immediate task and must be kept constantly in mind and have right of way everywhere and at all times," he says.

He urges that this country must avoid the mistakes which some other countries "have made to their hurt and which they are now trying to correct."

"If the war should be long and severe, there will be great need in its later days for many young men and women of scientific knowledge, training and skill," he points out. "When the war is over, whether within a few months or after many years, there will be such demands upon this country for men and women of scientific knowledge, technical skill and general culture as has never before come to any country. The world must be rebuilt."

## Opportunities for Students.

Pointing to the awakening in Russia and China, and saying they are on the eve of great industrial development, he says: "They will ask of us steel, engines and cars for railroads, agricultural implements and machinery for industrial plants." They will also need men to install these things and to direct development in every line, he says. England, France, Italy and the central empires have thrown into battle a large per cent of their educated and trained men, he explains, including most of the young professors and instructors in the universities and other institutions of learning.

"Therefore," he says, "a right conception of patriotism should induce students who cannot render some immediate service of great value to remain in college, concentrate their energies on their college work, and thus be all the more ready and fit when their services may be needed, whether for war or for the important work of reconstruction and development in our own and other countries when the war shall have ended."

## PLOTS AGAINST SHIPPING APPALLS ALL NORWEGIANS

Trunk Filled With Explosives Shipped to German Embassy Under Diplomatic Seal.

CHRISTIANIA, Norway, June 27.—Discovery of the German plot to destroy Norwegian steamers by explosives, unearthed late last week, has appalled the whole nation. The newspapers demand publication of all the facts in the case, and of the steps which are being taken to bring the matter to the attention of the German government. In all a ton of explosives has been discovered, concealed in artificial lumps of coal, which presumably were to be placed in ships' bunkers, and in bombs fitted with the most ingenious mechanism.

It has developed that a trunk full of explosives was brought to Christiania in February by a courier of the German foreign office, whose official seal was on the trunk. The trunk was addressed to the German embassy here, and, according to international usage, it was admitted without examination. After the discovery of the explosives the German embassy declared the trunk was destined for Finland, but no explanation was given as to why it had remained here so long.

The explosives were found in all

## "The Five Tires"

**Today—tires cost less than ever**

Your tires actually cost you less per mile today than they did a few years ago, —provided you buy the right kind of tires.

In the first place, don't buy a nondescript tire that some dealer has a selfish price motive in selling to you.

Buy a tire with a name behind it—a tire, the quality of which must be so good that the reputation of a great Company is protected.

United States Tires, with the name of the largest rubber manufacturer in the world behind them, are safe tires to buy.

United States Tires are constructed under an exclusive time-tried vulcanizing process that is patented.

They are honestly built with the best materials that the markets of the world afford.
